# History of Domsan

Domsan Inc. has been performing in Ankara / Turkey since 1968. Beginning from the foundation date, Domsan has been watching closely the technological innovations, and has succeeded to become one of the leader company in the furniture sector via his conception of both production technology and design.

The trademark Domsan Kitchen came on to scene via combining the Domsan Furniture's 37 years experience, and following the latest technological innovations and current market needs.

## Today

Domsan have been performing in 11,800 sqm closed area of 16,875 sqm total area. Domsan has a production capacity of 450.000 m2 panel cutting. Yearly 750 pieces kitchen as standart products and 3.000 - 5.000 pieces kitchen as contract jobs.

# Research and Design

R&D Department, consisted of architects and industrial product designers, making researchs for understanding public needs, after the completing of this kind of determinations they are come to stage of creation of a new model not only terms of functionality but also in terms of appereance. Reference to our R&D department's qualified and experienced designer team, we have succeeded to create unique solutions in all our projects.

# Technology and Experience

Domsan has equipped with latest technologies. In addition to superior production technologies, its production line is formed by German and Italian orginated machineries, most of them is CNC (computer) controlled and containing the newest wood processing technology. Regarding as most sophisticated technological comprehensions Domsan also bears in mind the importance of human resources, so Domsan has choosed to work with expertise of master craftsmen in all of works.

# Function

Domsan Kitchen is a fitted kitchen system consisted of designed units which are taking into consideration of users needs and habits.

# Certificated Quality

Domsan has proved his quality and organizational skills via completing big projects such as Hotels, Offices, Governmental Buildings, Hospitals, Schools, Dormitories, and Housing Estate Projects. Beside his own quality standarts, Domsan also knows the importance of Quality Certification Systems. Respect to its understanding of quality, Domsan took TSE-ISO-2002, TSE, BVQI, and all required warranty certificates. Additionally, Domsan was the first company in the sector in Turkey to obtain ISO 9001 certification for its Company Quality System from TSE (Turkish Standart Institution)
